An All-In-One Multiplatform Solution to Clinic and Pet Management

Daniel Carvalho

Supervisor: Diego Passos

Instructions written for Project and Seminar
BSc in Computer Science and Computer Engineering

July 2025

Project Repository

The project can be found at the following GitHub repository: https://github.com/cheestree/Vetly. At the time of writing, the repository is public and can be accessed and cloned by anyone.

Repository Organization

- **docs** - contains the API documentation and other details.
- **src** - contains the main components:
  - **client** - the Expo-based client.
  - **server** - the backend API in Kotlin.
  - **sql** - database scripts.

  as well as other files like a Docker compose file and corresponding *.env* file for deployment.

Execution

Instructions for setting up the project can be found in the project's `README.md` file.
